

Egocast

Welcome to egocast. Egocast allows you to create and manage social group inside WiFi. Just connect a couple of devices to WiFi router and go ahead! In egocast network you can make calls, exchange messages, send files and photos. Communicate with friends and meet new people in public places where there is WiFi. This instruction describes how to transfer files from your computer to the application.

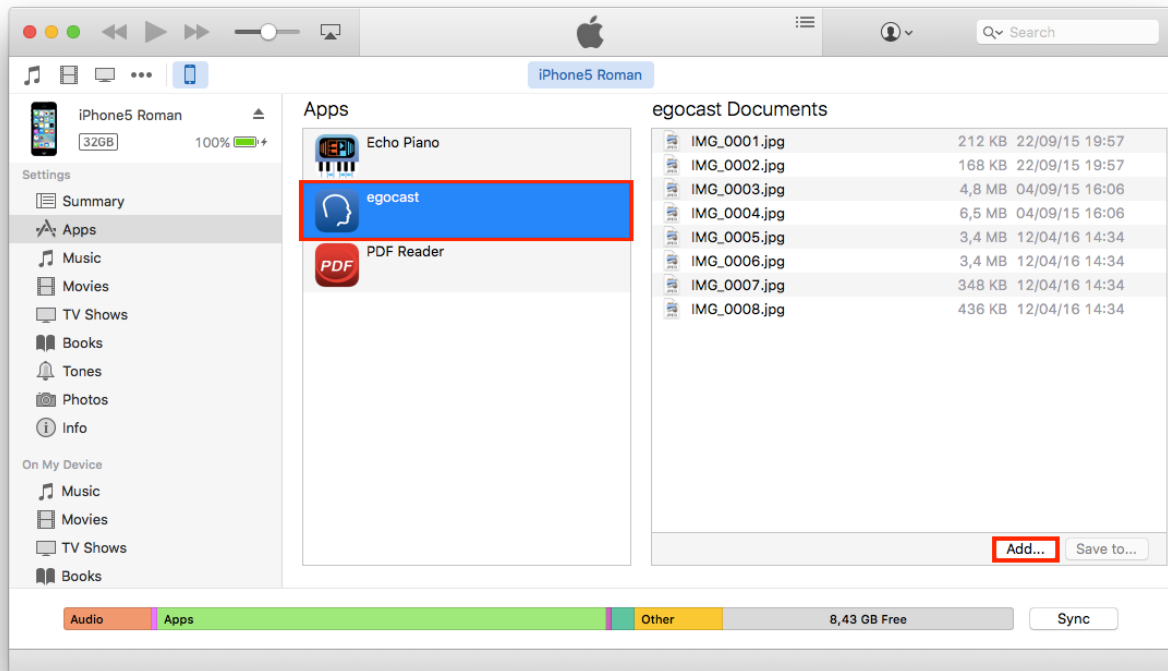

Transfer files

Connect your iOS device to your computer using a USB cable. On your computer run iTunes application (make sure you are using latest iTunes version).

1. Click on your device in iTunes and select Apps.

2. Select egocast and insert a file into your computer using «Add...» button.

3. To save file, please select the file and then click «Save to...» button after that you can select desired location.
